

# Vicky VenilMachado

+1 (602) 574-3389 | [machadovicky24@gmail.com](mailto:machadovicky24@gmail.com) | [Portfolio Website](#) | [LinkedIn](#)

## SKILLS

---

**Programming Languages:** Java, Javascript ,Kotlin, Python, C++, C

**Backend Development:** Microservices, PostgreSQL, MySQL, Spring Boot, ExpressJS, Node.js, Flask, REST API, Hibernate

**Frontend Development:** React, Angular, CSS, Bootstrap, JQuery, HTML

**Web Technology & Database:** Angular, Django, HTML, Bootstrap, CSS, MySQL, ORM, MongoDB, Kafka, Redis

**AWS Cloud:** AWS EKS, S3, EC2, Dynamo-DB, API-Gateway, Lambda, Transcribe, Comprehend, Cognito, SQS

**DevOps:** Kubernetes, Container Orchestration, Docker, Cluster Management, Monitoring and Logging, Resource Management

**Software Development Practices:** Agile, Scrum, Jira, Test Driven Development, Github, DevOps, Continuous Integration

**Tools:** IntelliJ, SQL Developer, Linux, Windows, Git, Jira, Jenkins, AppDynamics, DataDog, VSC, PyCharm, Qlik Sense

## EXPERIENCE

---

- |   |  |
|---|--|
| <b>Oracle</b><br><i>Software Developer</i>  | <b>Bangalore, India</b><br>Jul 2022 - Jun 2023 |
| <ul style="list-style-type: none"><li>• Led migration, design, development, and deployment of 2 PL/SQL retail banking applications into <b>microservices architecture</b>, achieving <b>30%</b> reduction in response times and enhancing system reliability by <b>40%</b>.</li><li>• Orchestrated E2E creation of lending products and configured monitoring tools boosted operational efficiency by <b>35%</b> and decreased downtime by <b>20%</b>.</li><li>• Introduced <b>data security</b> measures in backend services, ensuring industry compliance and enhancing system security and <b>optimized technical computations</b>, reducing processing time by <b>25%</b>.</li><li>• Developed and automated an efficient algorithm to delete old <b>Redis keys</b> created without TTL to eliminate <b>2 hour(s)</b> of manual deletion to keep the disk space in check.</li><li>• Streamlined an automated process for downloading and comparing key application deliverables with an <b>83%</b> overall time gain.</li><li>• Innovated Java annotation for handling business-required exceptions, utilized across 12 microservices.</li><li>• Sustained code coverage above <b>95%</b>, performed code reviews, CI/CD pipelines integration, performance testing, and E2E testing.</li></ul> |  |

- |   |   |
|---|---|
| <b>HSBC</b><br><i>Senior Software Engineer</i>  | <b>Pune, India</b><br>Mar 2022 - Jul 2022 |
| <ul style="list-style-type: none"><li>• Engineered and rolled out efficient and highly scalable microservices for banking applications, resulting in improved system performance and reliability and enhancing scalability by <b>50%</b>.</li><li>• Unified mobile and desktop APIs into single entry points, enhancing code reuse by <b>60%</b>, performance by <b>35%</b>, and reducing maintenance efforts by <b>50%</b>.</li><li>• Maintained test coverage for every feature above <b>90%</b>, ensuring functionality verification across all aspects.</li></ul> |   |

- |   |                     |
|---|---------------------|
| <i>Software Engineer</i>  | Jul 2019 - Mar 2022 |
| <ul style="list-style-type: none"><li>• Automated HSBC's flex notional rate updates, reducing errors by 90% and boosting efficiency by 75%. Received departmental recognition in 2022.</li><li>• Authored multiple scripts via cron Job using Spring Framework to efficiently upsert million enteries in <b>MySQL tables via RMQ</b> which eradicated <b>2.5</b> hours of user-driven activity each day.</li><li>• Enhanced system metrics through telemetry integration, enabling detailed logging and API correlation with vector contexts, which improved issue detection and resolution of online bugs by <b>40%</b>.</li><li>• Launched the Reach Us application to address employee grievances, enhancing internal communication and improving problem resolution efficiency by <b>30%</b>. Received a <b>Pat on the Back Award</b> for expeditious delivery, <b>2019</b></li></ul> |                     |

## PROJECTS

---

- |   |                     |
|---|---------------------|
| <b>Notification Scheduling Service</b>  | Jun 2024 - Jul 2024 |
| <ul style="list-style-type: none"><li>• Created a robust RESTful notification scheduling service using Spring Boot 3, Spring Data JPA, Quartz Scheduler, and SQL.</li><li>• Optimized data handling with Jackson for scalable payloads, enhancing reliability, increasing user engagement by 25%, and reducing scheduling errors by 30%</li></ul> |                     |

- |  |                     |
|--|---------------------|
| <b>Elastic Video Analysis Application Using AWS PaaS</b>   | Jan 2024 - May 2024 |
| <ul style="list-style-type: none"><li>• Architected an elastic video analysis app using AWS Lambda and S3, cutting infrastructure costs by <b>40%</b>.</li><li>• Implemented FFmpeg for video frame extraction and ResNet-34 with SSD algorithm for face recognition, ensuring scalable and cost-effective video processing, improving processing speed by <b>50%</b>.</li></ul> |                     |

- |   |                     |
|---|---------------------|
| <b>Intelligent Farming System</b>   | Aug 2018 - Mar 2019 |
| <ul style="list-style-type: none"><li>• Completed an IoT-based Greenhouse Automation System to monitor and control environmental factors in real-time.</li><li>• Designed an Android application for seamless monitoring, alerts, and control of critical actions like watering and pest control, improving plant care efficiency and reducing manual intervention by <b>50%</b>.</li></ul> |                     |

## EDUCATION

---

- |  |                    |
|--|--------------------|
| <b>Arizona State University, Tempe, Arizona, USA</b><br>Masters of Science in Computer Science | Aug 2023 - Present |
|--|--------------------|

- |  |                     |
|--|---------------------|
| <b>Bangalore Institute Of Technology, Bangalore, Karanataka, India</b><br>Bachelor of Engineering in Electronics and Communication | Jul 2015 - May 2019 |
|--|---------------------|
